Personal Project

Marlo

Design an attractive HTML and CSS landing page with visuals and compelling content. Ensure responsiveness and user-friendly experience.

Food Prime

Creating a food app using HTML ,CSS ,and JavaScript involves designing a user interface to display food items and handling user interactions,

Meesho - E commerce Website

In this project, we aim to create a front-end for an ecommerce website inspired by the Meesho platform using React. The primary focus will be on the user interface, design, and layout of the website, while not implementing the actual back-end functionality for product management, user authentication, and transactions.

UI Responsive Design

I successfully developed a responsive website using Bootstrap, CSS and HTML ensuring seamless functionality and aesthetics across different device and screen sizes. My project incorporated mobile-first design principles, delivering an optimal user experience on smartphones and tablets.
